

# How to setup GitLab

# Git

- From now, you should submit your lab assignment on GitLab.
- Deadline for submission is same.

# Git

- Install Git (Linux)

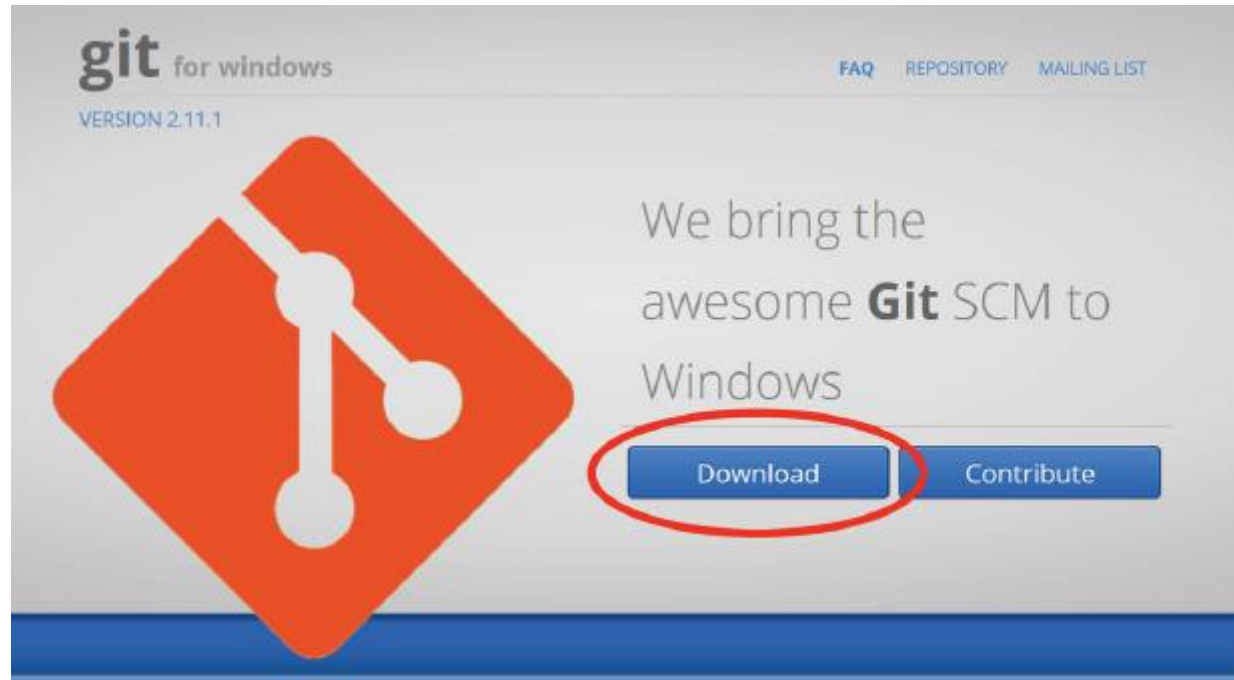

Ubuntu

```
$ sudo apt-get install git
```

```
mrbin2002 — mrbin2002@ubuntu: ~ — ssh mrbin2002@10.211.55.7 — 74x21
mrbin2002@ubuntu:~$ sudo apt-get install git
[sudo] password for mrbin2002:
Reading package lists... Done
Building dependency tree
Reading state information... Done
git is already the newest version.
0 upgraded, 0 newly installed, 0 to remove and 51 not upgraded.
mrbin2002@ubuntu:~$
```

# Git

- Install Git (Window)
- Access to <https://gitforwindows.org/>

# Git

- Set up Git user info

```
$ git config --global user.name "2007002245"
```

```
$ git config --global user.email "<your email address>"
```

( user.name is your student\_ID

user.email is registered Email on GitLab)

# Git

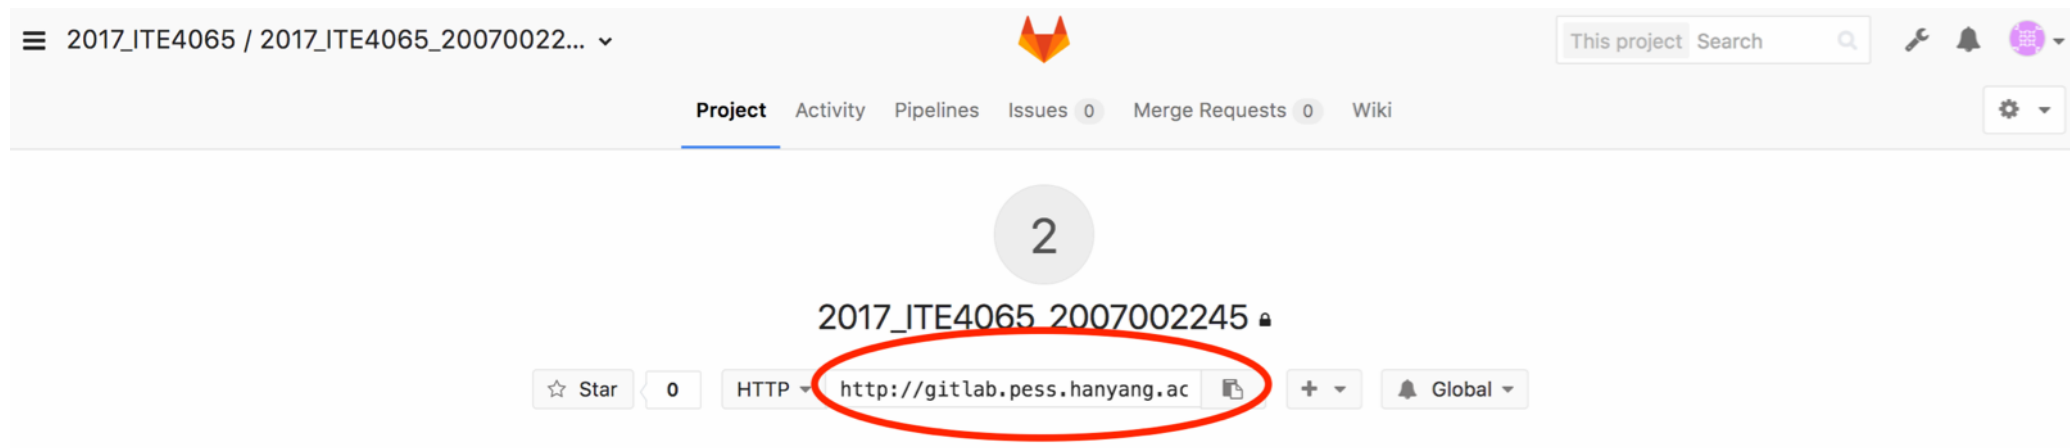

- Clone Git Repository

```
$ git clone https://hconnect.hanyang.ac.kr/<Year>_<Course no.>_<Class code>/<Year>_<Course no.>_<Student ID>.git
```

```
$ git clone https://hconnect.hanyang.ac.kr/<연도>_<학수번호>_<수업코드>/<년도>_<학수번호>_<학번>.git
```

```
예): $ git clone https://hconnect.hanyang.ac.kr/2020_CSExxxx_yyyyy/2020_CSExxxx_2020123456.git
```

You can check your Git URL in GitLab project page

The screenshot shows a GitLab project page for '2017\_ITE4065 / 2017\_ITE4065\_20070022...'. The repository name is '2017\_ITE4065\_2007002245'. The URL 'http://gitlab.pess.hanyang.ac' is circled in red. The page also shows '0' stars and '0' merge requests.

# Git

- When you clone your project
- Username : StudentID
- Password : Password registered in GitLab(page 7)

```
TA — mrbin2002@ubuntu: ~ — -bash — 76x21
[Jongbin:TA mrbin2002$ git clone http://gitlab.pess.hanyang.ac.kr/2017_ITE406]
5/2017_ITE4065_2007002245.git
Cloning into '2017_ITE4065_2007002245'...
Username for 'http://gitlab.pess.hanyang.ac.kr': 2007002245
[Password for 'http://2007002245@gitlab.pess.hanyang.ac.kr':
warning: You appear to have cloned an empty repository.
[Jongbin:TA mrbin2002$ ls
2017_ITE4065_2007002245
Jongbin:TA mrbin2002$ █
```

# Git

- Move to Clone directory

```
$ cd <Year>_<Course no.>_<student ID>
```

```
$ cd <연도>_<학수번호>_<학번>
```

- Make test file

```
$ vi test.c
```

```
2017_ITE4065_2007002245 — mrbn2002@ubuntu: ~ — vi test.c — 76x21
1 hello world
~
~
~
~
```

- When you check the current git status, “test.c” is displayed as untracked.

```
$ git status
```

```
[Jongbin:2017_ITE4065_2007002245 mrbin2002$ git status  
On branch master  
  
Initial commit  
  
Untracked files:  
  (use "git add <file>..." to include in what will be committed)  
  
    test.c  
  
nothing added to commit but untracked files present (use "git add" to track)  
Jongbin:2017_ITE4065_2007002245 mrbin2002$
```

# Git

- Move all added/modified files in the current directory to Stage area  
(It means that test.c file is managed by Git)

```
$ git add .
```

- Check git status

```
$ git status
```

```
[Jongbin:2017_ITE4065_2007002245 mrbin2002$ git add . ]
[Jongbin:2017_ITE4065_2007002245 mrbin2002$ git status ]
On branch master

Initial commit

Changes to be committed:
  (use "git rm --cached <file>..." to unstage)

    new file:   test.c
```

# Git

- Commit added/modified files (Save on Local repository)

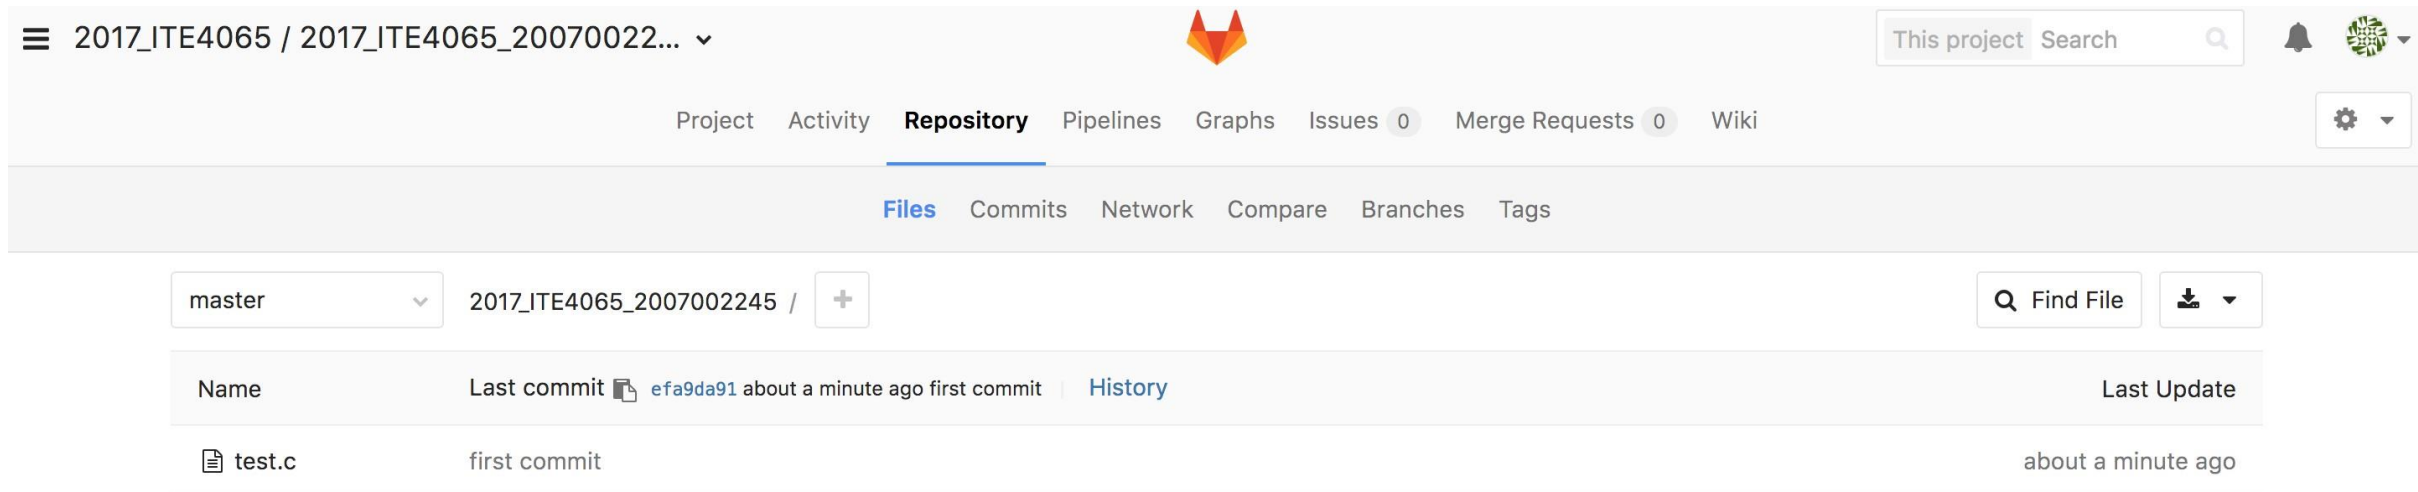

```
$ git commit -m "first commit"
```

- Send Committed Content to Remote Repository

```
$ git push origin master
```

```
[Jongbin:2017_ITE4065_2007002245 mrbin2002$ git commit -m "first commit"  
[master (root-commit) efa9da9] first commit  
1 file changed, 1 insertion(+)  
create mode 100644 test.c  
[Jongbin:2017_ITE4065_2007002245 mrbin2002$ git push origin master  
Counting objects: 3, done.  
Writing objects: 100% (3/3), 224 bytes | 0 bytes/s, done.  
Total 3 (delta 0), reused 0 (delta 0)  
To http://gitlab.pess.hanyang.ac.kr/2017_ITE4065/2017_ITE4065_2007002245.git  
* [new branch]      master -> master
```

- Files sent to the remote through the git push can be found on the GitLab web page.

The screenshot shows a GitLab repository page for a project named '2017\_ITE4065 / 2017\_ITE4065\_20070022...'. The page is in the 'Repository' tab, specifically the 'Files' view. The current branch is 'master'. The repository path is '2017\_ITE4065\_2007002245 /'. There is a search bar for 'This project' and a 'Find File' button. The file list shows a single file named 'test.c' with a 'first commit' and a 'Last Update' of 'about a minute ago'. The commit hash 'efa9da91' is visible next to the commit information.

Name	Last commit  efa9da91 about a minute ago first commit   <a href="#">History</a>	Last Update
 test.c	first commit	about a minute ago
